HEALTHCARE SUPPLY SOLUTIONS

Chem Wipe

Pour-in bucket wipe dispensing system

6 × 12 in

Perforated white wipes

180 sheets

Per centerpull roll

6 rolls

Per case / 1,080 sheets

YOUR COMPATIBLE SOLUTION. YOUR WORKFLOW.

A dry wipe and bucket system for healthcare facilities evaluating flexible surface-wiping supply options. Add a compatible, facility-approved solution at the point of preparation. Strong, absorbent, low-lint wipes; refill rolls available.

Plan for continuity of supply

Discuss samples, refill-roll requirements and future orders with NOW to support production planning. Availability is confirmed during sourcing.

Preparation steps, ordering options and compatibility review on page 2.

CHEM WIPE / SETUP & ORDERING

Load. Pour. Dispense.

1 LOAD

Place the dry centerpull roll in the bucket.

2 POUR

Add a compatible solution to saturate the wipes, following the approved preparation instructions.

3 DISPENSE

Thread the center wipe through the lid opening. Close the lid and reseal between uses as directed.

ORDERING OPTIONS

Configuration	Product reference	Case pack
Refill rolls	MW-60-CP-CHEMWIPE-180	6 rolls
Bucket starter pack	MW-60-CP-CHEMWIPE-180-1B	6 rolls + 1 bucket

Both options: 6 × 12 inch perforated wipes, 180 sheets per roll. Refill case: 6 lb, 98 cases per pallet. Starter case: 6.5 lb, 77 cases per pallet. Confirm final specifications when ordering.

SOLUTION & INTENDED-USE REVIEW

Supplied dry; solution is added separately. Confirm wipe/solution compatibility, preparation instructions and facility protocols before use. Source documentation describes a surface-wiping system and does not establish patient-bathing, skin-contact or CHG compatibility. No antimicrobial or disinfection claim is made for the dry wipe itself.

PLAN YOUR NEXT ORDER

Share your intended use, proposed solution, estimated monthly volume and required delivery date. NOW can support sample requests, refill planning and future production discussions.
